

NAME: AMOS WINTER
COUNTRY: PUERTO RICO

INTRODUCTION ABOUT COUNTRY

- Puerto Rico is a commonwealth of the USA with a population of 4 million. It was claimed by the Spanish Crown in 1493 following COLUMBUS' voyage to the Americas. In 1898, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917.
- white (mostly Spanish origin) 76.2%, black 6.9%, Asian 0.3%, Amerindian 0.2%, mixed 4.4%, other 12%

Home

Welcome to the Caribbean Atmospheric Research Center ("Atmos Carib"), established since May 1st 1992. Our aim is to offer the most comprehensive weather and climate information for the Caribbean Region. We are continuously adding new data, so check this site frequently.

Atmos Carib Research Center is located at the [University of Puerto Rico - Mayagüez Campus](#), and is affiliated with the National Climate Data Center in North Carolina and the Southeast Regional Climate Center in South Carolina. Our mission is to coordinate climate activities and to provide climate services. We prepare, publish and disseminate regular climate information for individuals and organizations whose activities are related to the welfare of Puerto Rico, and analyze climate data to determine trends and recurring cycles. All weather information provided is generated locally using [UNIDATA](#) software. We also provide data from other stations that is not available through the website. All this information is available for you upon request.

If you are interested in climate data from stations located in Puerto Rico, please visit our [Request Data](#) section.
