REGISTRATION OF INTERNS

Please remind Consultants supervising Interns to be **fully registered by 17TH December 2019** that their forms signifying a satisfactory rotation must be completed in time for the registration to occur before this date.

We have had questions from the General Medical Council (GMC) and Canada re doctors applying for registration with those licensing bodies querying the differences in the times between doctor's start of practice and registration date.

Your kind cooperation would be appreciated in this process.

Thank you.
