

MESSAGE FROM THE EDITOR-IN-CHIEF

The Board of the West Indian Medical Journal congratulates the organizers of this conference on their dedication to continuing medical education in the field of diabetes mellitus and its complications. The presentations will be of value to researchers, general and specialist physicians, nurses, diabetes educators, *etc.* There are presentations on cannabis and its role in decreasing the risk of Type 2 diabetes. There is also discussion on the many cannabinoids that may have medicinal properties. The management of diabetic neuropathy and nutritional management of such will be of tremendous interest as this complication of dia-

betes is common and confronts practitioners managing diabetic patients. I have no doubt that the conference will be of its usual high standards and be of benefit to all attendees.
