

Poster Programme

- (P – 1) *Exploring the usefulness of cognitive behavioural therapy in the treatment of bowel problems*
V De-petro
- (P – 2) *Clinical profile of pituitary tumours in Jamaica*
N McLennon, IW Crandon, SO Cawich, HE Harding
- (P – 3) *Infection control practice in the operating room: staff compliance with existing policies in a developing country*
SO Cawich, I Tennant, CD McGaw, HE Harding, CA Walters, IW Crandon
- (P – 4) *Epidemiology of diabetic foot infections in an eastern Caribbean population: a prospective study*
S Islam, P Harnarayan, SO Cawich, S Budhooram, V Bheem, V Mahabir, S Ramsewak, I Aziz, V Naraynsingh
- (P – 5) *Extremity injuries from motorcycle road traffic accidents: the experience from a tertiary referral hospital in Jamaica*
SO Cawich, REC Rose, HE Harding, M Isaacs, IW Crandon
- (P – 6) *Shoulder arthroscopy for recurrent anterior shoulder dislocation in Jamaica*
A Ameerally, W Palmer
- (P – 7) *Closure of rectourethral fistulas using a combined abdominal and posterior sagittal approach*
MV Vincent, ND Duncan
- (P – 8) *Management outcomes of facial nerve tumours: comparative outcomes with observation, CyberKnife and surgical management*
GA Channer, B Herman, FF Telischi, D Zeitler, SI Angeli
- (P – 9) *A rare visceral artery aneurysm as a red herring*
R Maharaj, E Renaud, V Bando
- (P – 10) *Sublabial paraseptal trans-sphenoidal approach to excise pituitary tumours at the University Hospital of the West Indies, Jamaica*
N McLennon, IW Crandon, SO Cawich, HE Harding
- (P – 11) *Paget's disease of the breast: is a mastectomy still the recommended treatment of choice?*
A Josephs, L Simpson, R Aitken, SO Cawich
- (P – 12) *Intra-luminal migration: a rare complication of choledochoduodenostomy*
JA Dominguez-Eljaiek
- (P – 13) *Umbilical hernia repair in Jamaican children*
C Abel, N McLennon, A Stanley

(P – 14) *Breast cancer: evaluating management protocols in Caribbean countries with evolving healthcare delivery systems*
JA Dominguez-Eljaiek

Endo GIA™ 30mm Reload With Tri-Staple™ Technology:

[Addressing The Challenges Of Extra-Thick Tissue]

With the thickest tissue capacity of any stapler on the market, the Endo GIA™ black reload with Tri-Staple™ technology offers superior staple formation¹ and staple line strength² when compared to competitive offerings. It is the ideal solution for managing thick and dense tissue that's common to sleeve gastrectomy, wedge resection or pancreatotomy. To learn more, visit www.covidien.com/tristaple

1. Staple line evaluation of two stapler designs (Endo GIA™ black 30mm reloads with Tri-Staple™ technology and Ethicon Echelon Two™ green 30mm reload) in expanded porcine esophageal. Study performed by Covidien in 2011. 2. Tri-Staple™ technology bench top testing/TriStaple™ pull apart comparison between black 30mm reload, Tri-Staple™ reload, and Ethicon Echelon™ staple. Staples were tested into double layer, 4mm thick porcine esophagus and then pulled apart by hand. The peak forces were recorded. Study performed by Covidien in 2011.
