

Symposium on Infection Control

Speaker: Elethia Dean

The Ophthalmological Society of Jamaica is pleased to collaborate with The Flying Eye Hospital ORBIS team to present a workshop on Infection Control. This will be a two-day course which is designed specifically for nurses and will be held simultaneously with the OSJ conference.

Please note although this workshop has been designed for nurses, it will be of great benefit to allied health

personnel working in hospitals, private offices and operating theatres.

The programme will comprise a two-day workshop on infection control for all medical personnel and allied health professionals (*Day 1*) and Infection Control for the Surgical Nurse (*Day 2*).
