

Financial Profile of Students

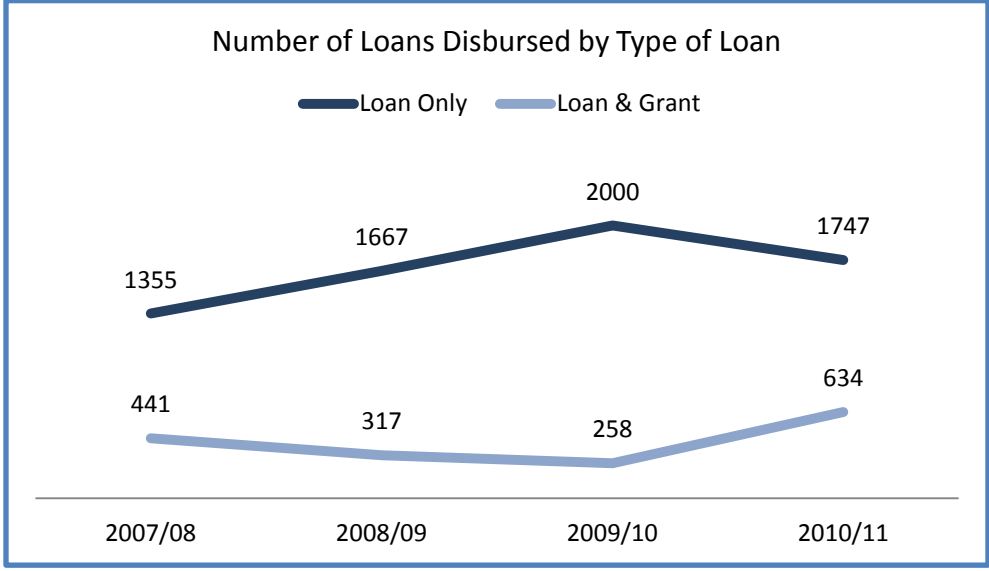

Source: Students Loan Bureau

Collected by: Office of Planning and Institutional Research

Findings: Since 2007-08, the Students Loan Bureau (SLB) has approved between 2,000 and 3,000 loans annually for UWI, Mona students. In terms of demand, less than 1% of these loans were approved for postgraduate students, while almost all (99.6%) of these loans were approved for undergraduate students. Over the period, the SLB has approved and disbursed more loans than loans with grants. In addition, the proportion of approved loans has been higher than the proportion of disbursed loans, suggesting that a small proportion of students cancel or decline these loans after the loan has been approved.

Findings: Since 2007-08, the percentage of students receiving assistance from the Students Loan Bureau (SLB) has increased, while the percentage of students declining assistance has decreased. When SLB recipients and non-SLB recipients are compared, students receiving assistance are, on average, younger, receive more awards and scholarships, and have better financial clearance.

Percent of SLB Recipients and Non-SLB Recipients with Financial Clearance

Source: Student Experience Survey, 2010

Target Population: 1st, 2nd and final year First degree registrants at Mona and the satellite campuses. Students at tertiary and affiliated institutions excluded.

Conducted by: Office of Planning and Institutional Research

Findings: Almost half of respondents reported financing their education through the assistance of their parents. Thirty-eight percent (38%) reported a student loan and 17% financed their education themselves. Year 1 respondents were most likely to report their parents (52%), while final year respondents were most likely to report a scholarship (14%) and financing their education themselves (24%).
