DEPARTMENT OF EDUCATIONAL STUDIES

Professor Zellynne Jennings-Craig, BA (Hons) *Hull, MA Leeds, MEd Birm, PhD UWI* – Head of Department

WORK OF THE DEPARTMENT

During the 2004-2005 academic year, the Department focused on implementing strategies to achieve the following strategic objectives: enhanced student centredness through a student driven environment that is supportive of learning and technologically enriched; the continued strengthening of tertiary level institutions; and enhanced graduate study and research through additional course offerings, improved graduate facilities, support for doctoral research of staff members and the dissemination of graduate level research.

In the area of student centredness, the Department’s achievements during the year included an expanding mentorship programme, meetings with students, workshops and classes designed to assist students with their academic performance and emotional stability and an expansion in the number of on-line courses and courses for which on-line information was available. The Department continued to strengthen tertiary level institutions through enhanced collaboration and the implementation of new programmes. In addition to the new collaborative bachelors degree programmes, the department commenced the development of new graduate programmes (MA Teaching, MA Higher Educational Administration, MA Student Personnel Administration), and a more structured approach to the supervision of masters theses. The facilities of the graduate computer room were also improved as a mechanism to meet the strategic objective of developing graduate students and research. This latter strategic objective was also addressed through the support of doctoral research for two staff members, the holding of workshops on approaches to mathematics teaching, an annual forum on education and the presentation of the research of graduates to officials of the Ministry of Education, Youth and Culture.

During the upcoming academic year, the Department’s strategic objectives include curriculum change, leading to additional programme development at the undergraduate and graduate levels, enhanced quality assurance and increasing the morale of staff members through an improved working environment. The programme development would incorporate the delivery during the coming academic year of programmes currently under development in addition to the revision of twenty new courses, the development of a quality assurance manual and the implementation of a peer review system.

No. of academic staff = 19 (1 on leave) Per Capita publication = 1.1
